

I'm an experienced and creative lighting cameraman with over 10 years freelance on a broad range of location and studio shoots on a wide variety of productions. I'm conversant in the use of all current broadcast formats and associated equipment. Easy to work with, I pride myself on the quality & speed of my camerawork & lighting with an attention to detail and an enthusiasm for every new project. Over the past year I have embraced the latest HD-SLR format that produces a stunning film-like look & I'm building an increasingly comprehensive kit as I shoot more on this format.

BROADCAST EXAMPLES
